

Integrated Hospital Management System

An Integrated Tool for Healthcare Management

Hospital Management System (HMS) has been designed to streamline the business practices of hospitals and clinics. Through its electronic patient information system, HMS ensures optimum use of the medical records of patients. Being patient-centric, the system makes it possible for all disparate files on a patient to be housed in a centrally located master file, ensuring retrieval and management of files effortless. Plus, easy integration ensures a faster start up.

HMS has been so designed as to make its usage intuitive, which makes adoption of HMS by the hospital personnel quick and easy. Its high level of scalability ensures quick upgrades when change in the hospital's business practices so demands. What is more, with information collection, collation and retrieval all digitized, patient care regains top of mind status with physicians and hospital personnel.

To round off, our Hospital Management System provides the benefits of streamlined operations, enhanced administration and control, superior patient care, strict cost control and improved profitability.

It has been observed that every organization falls into a growth cycle once it is truly organized. The major mode of organization in the healthcare system is an established IT backbone.

Hospital Software is such software that enables the administration to run the organization smoothly.

It empowers the management to visualize the entire business happening of the organization sitting in front of a PC.

Hospital Software helps you to understand the vital elements of your business and gives you most vital information regarding your future trends and necessary corrective action. Therefore this solution takes unparalleled care of each and every information need of a modern hospital unlike just a package made by computer professionals for whom it is not possible to understand the intricacies of the health care management, thus, it is a '**Hospital Software touch**'.

Main MODULES

- OPD/Out Patient Department
- IPD/In-Patient Department
- Clinical Support
- Hospital Administration
- Ancillary Services
- Operation Theatre

Overview of the Features & Modules

OPD/Out Patient Department
